

Commissioning Service

- Operation of unit checked
- Temperature sensor lead checked
- Condensate drain checked
- Controller and Timeclock checked and set up
- Registers balanced
- Airflow measured and recorded
- Full report given
- Not a 2nd Fix installation service

Overview

Our Commissioning Service involves a member of our technical team attending your site/home to set up and commission your ventilation system and offer full user guide instruction.

This is not a Second Fix installation service. Its purpose is to *adjust and commission the system* and ensure the operation / maintenance is fully understood.

Report

Our Commissioning Service includes a full report with a signed commissioning sheet.

The report will also detail any work to be completed, any recommendations and replacement filter prices, together with full user guide instructions.
